

**Sprint** compounds

Friction vs temperature

- 333 – sprint / sprint endurance compound with smooth bite, torque & release
- 39 – sprint / semi-endurance compound for circuit racing or tarmac rallying. Virtually no torque rise with temperature.
- 15 – designed for ABS systems & high temperature applications. Low wear rate & gentle on discs.
- 13 – high bite / high friction compound with excellent release characteristics.
- 11 – sprint / medium distance ultra-smooth compound. Improved bite, modulation & release.
- 01 – sprint / medium distance compound with little torque rise with temperature. Low wear rate.

At Performance Friction® every employee has “passion for the product” ... and it shows ...  
 PFC Brakes continues to be the market leader wherever drivers demand unrivalled performance and quality – No Compromises™.  
 Our brake calipers, discs and pads outperform the competition in all markets, from professional racing to commercial fleets.
